

To the members of the FCC,
I am appalled that the First Amendment is under attack yet again. Without the ability to listen to XM Radio my husband and I would not be able to listen to up-to-date news and weather. Local radio stations are not powerful enough to reach us as we travel across the United States in an 18-wheeler and the ones that we can get are inadequate for our needs.

XM radio has been our only form of news, weather, traffic and of entertainment for six weeks at a time. We pay for this service and enjoy it for several reasons. the main reason is that we don't have to listen to objectionable DJ's because its the only station available. Also, we do not have to listen to commercials for local goods that we would not purchase in the first place as we are just travelling through.

This country is based on our ability to select what services we chose and want into our homes and cars. Our family has decided to use and enjoy XM radio. To date I have not found any objectionable or outlandish behavior on XM. I have found some very enjoyable and delightful programs. I beg you, as a tax payer and voter, to reject the NAB's petition 04-160. XM radio is technology at its finest available to all who wish to purchase it.
